

LAB 8

YOUR TASK:

1. Learn Security Protocols and Solutions
2. Install and configure protocol SSH

1 Basic ssh usage

1.1 Connect to a remote machine using the same user (on localhost and remote host)

[user@local_machine Testdir] \$ ssh remote_machine

1.2 Connect to a remote machine using a different user (on localhost and remote host)

In those examples local account is user and remote account is root.

[user@local_machine Testdir] \$ ssh root@remote_machine

or

[user@local_machine Testdir] \$ ssh remote_machine -l root # this syntax may be useful when you do
